## Resume

### **Jonathan S. Price, AIA, Associate**

Jonathan Price has practiced architecture for over twenty years providing a full range of services from pre-design through construction administration and project close-out. He has significant experience providing management and design services for K-12 school districts, community colleges, and universities.

Jonathan's work history includes work for both private developers and public entities on projects ranging from simple assessments to multi-million dollar developments. His responsibilities included coordination with contractors, engineers, project managers, owners, and public authorities. Recently, Jonathan has provided expertise on several roof remediation projects and accessibility upgrades. Jonathan's role on these projects typically included initial assessment, design, construction detailing, material selection, and construction observations.

Jonathan also has significant knowledge of the construction process, having provided construction administration services continuously throughout his career. He is experienced in reviewing progress payments, compliance with construction documents, contracts, and related safety codes.

Jonathan is a graduate of Carnegie Mellon University with a Bachelor of Architecture degree. He has been a licensed Architect in Oregon since 2006.
